FOR IMMEDIATE RELEASE

Graphic Finishing Partners to Debut 50% More Productive 63” Top Heat Laminator at SGIA

Green Lake, WI, October 1, 2012 - Graphic Finishing Partners LLC (Gfp) has taken the next step in its line of no-nonsense Professional Top Heat laminators by introducing the **563TH MAXPRO**. Built with the same rugged performance as the popular 463TH, the 563TH MAXPRO adds features that make overlamination, mounting and pre-coating of boards 50% more efficient for operators.

The most obvious change is the Swing-out film shafts on the front and rear of the machine, which mean faster film changes without bending over. Slide one roll off, and slide the new one on. What’s more, the 563TH MAXPRO accommodates 300 foot rolls of film, creating another time and energy saver.

The 563TH MAXPRO has the same easy set-up and operation, 1” variable roller gap, 4.5” silicon rollers and 140 degree top-heated roller. It operates at speeds up to 13.5 feet per minute, but with the Optional Speed Kit you can achieve speeds to 20 feet per minute. Despite its rugged construction, it operates on standard 110 v 15 amp household electric, so it can be used anywhere with no special wiring.

“Already we’re being thanked for the film shafts,” says Mitch Noble, co-owner of Gfp. “We’ll have the 563 at SGIA, and will begin shipping to customers in January.”

Gfp supplies on-site installation and service for the 563TH MAXPRO through national service technicians. For more information about our dealer network, please contact Bob Pryor at 941-552-6691 bob@gfpartnersllc.com.

About Graphic Finishing Partners LLC (Gfp)

Graphic Finishing Partners LLC (Gfp) opened its doors in 2009 in response to the growing need for more affordable, yet high quality, print finishing equipment and supplies. Its mission is to provide finishing shops with the tools they need to produce profitable results while helping them keep their costs down. Gfp offers lamination equipment and supplies through dealers nationwide.
