FOR IMMEDIATE RELEASE

Graphic Finishing Partners introduces low-cost, High Performance Wide Format Laminators

Green Lake, WI, April 1, 2011 - Graphic Finishing Partners LLC (Gfp) recently introduced its new 400 Series Professional Top Heat laminators in 55" and 63" widths to an enthusiastic market looking for the kind of quality that usually comes with a huge price tag.

Easy to operate, these systems are becoming a favorite with operators who prefer simple, time-saving set-up with the features of a professional system. The 400 Series laminators offer roll-to-roll capability, 1" variable roller gap, 4.5" silicon rollers, 140 degree top heated roller and speeds up to 13.5 feet per minute. They're ruggedly built for applications that require PSA films for overlamination, mounting and pre-coating boards. Yet they operate on standard 110 v 15 amp household electric, so they can be used anywhere with no special wiring.

"For years the best quality always came at a price that was unattainable for smaller shops," says Mitch Noble, co-owner of Gfp. "So we used our combined seventy-five years of experience and created our own product line based on the real-world needs of the print finishing industry. Our goal is to provide high performance at an entry level price."

Gfp supplies on-site installation and service for the 400 Series equipment through national service technicians. For more information about our dealer network, please contact Bob Pryor at 941-552-6691 bob@gfpartners.com.

About Graphic Finishing Partners LLC (Gfp)

Graphic Finishing Partners LLC (Gfp) opened its doors in 2009 in response to the growing need for more affordable, yet high quality, print finishing equipment and supplies. Its mission is to provide finishing shops with the tools they need to produce profitable results while helping them keep their costs down. Gfp offers laminating equipment and supplies through dealers nationwide.
