

TESTIMONIAL

Don,

I want to thank you for the training session today on the Wide Format Laminator. As you know, finishing is a crucial part of the production cycle, so I see your training class as a good investment (not easy to find these days)! I appreciate you introducing us to some of the available specialty laminates and finishes as well.

Also, I'd like to mention here that our supplier won the bid to sell us the machine in part by the training package. When I inquired as to why training was not included in the bids, the competing vendors stated that laminator training is really not necessary. That you just power it up and you're ready to go.

If I had gone with one of the other vendors without your training, I can see now that there would be quite a learning curve, many phone calls, and a lot of frustration!

Best of luck, and thanks again,

Daniel Donnelly
Director of Operations
