FOR IMMEDIATE RELEASE

Graphic Finishing Partners introduces a game-changing laminating film

Maryland Heights, MO, April 15, 2019 - Graphic Finishing Partners LLC (Gfp) is excited about their revolutionary new overlamine film for short term wide-format graphics. Linerless Polypropylene (LPP) film is an ideal choice for Wide Format Prints, Mounting Board, and Label Printing.

What's revolutionary about LPP is that users get the same crystal-clear results as PVC films with a liner; but LPP starts with a polypropylene substrate, water-based acrylic adhesive, and NO liner. What that means to users is:

- No waste to end up in landfills
- Low noise unwind during production
- Non-toxic, non-yellowing film (Prop 65 Compliant)
- No toxic odors because it's phthalate-free
- Scuff, moisture and chemical-resistant
- Faster throughput speeds
- Faster "Wet out" time--fish eyes are gone in hours, not days
- Cost savings of 50% over PVC film
- And you don't pay for a liner, its weight, storage or disposal

For short-term graphic applications, Linerless Polypropylene makes sense in so many ways. It's perfect for Ink Jet Media printed with solvent, eco-solvent or latex inks, and boards printed with UV cured inks.

To see Linerless Polypropylene film in action, visit Gfp in **Booth 816** at the ISA Show. For more information about our dealer network, please contact Rob Acker at (800) 986-2005 rob.acker@gfpartnersllc.com.

About Graphic Finishing Partners LLC (Gfp)

Graphic Finishing Partners LLC (Gfp) opened its doors in 2009 in response to the growing need for more affordable, yet high quality, print finishing equipment and supplies. Its mission is to provide finishing shops with the tools they need to produce profitable results while helping them keep their costs down. Gfp offers lamination equipment and supplies through dealers nationwide. www.gfpartnersllc.com.
